Create a Focus on Building an Ethical Culture

Ethical issues are everywhere.

This transformational online training provides school board members with the tools and support to successfully understand ethical perspectives. As a board member works toward building an ethical culture in a school system, they learn to understand compliance issues and associated responsibilities of system and school administrators.

3-Hour Online Course

This one-of-a-kind program is delivered online and provides school board members with the following tools to build an ethical culture in their school system.

Local board members, will:

- Understand the ethical decision making processes of school system employees.
- Have the ability to understand your own ethical perspective along with the ethical perspectives of others, highlighting overall ethical diversity.
- Have the ability to comprehend real-life ethical issues that school administrators face when enforcing the Georgia Educator Code of Ethics. (Scenarios were developed with the support of GA superintendents).
- Understand the actions and work associated with educational ethical situations.
- Have the ability to identify ethical criteria that provide the foundation of professional ethics.
- Have the ability to better support school administrators to improve educator ethics.
